# UCedge™

## Unified Communications

Empowering Android and Apple smartphones, tablets, PCs and Mac<sup>1</sup> to perform as extensions on your Toshiba business phone system

VIPedge

Strata  
CIX™

IPedge

## INCREASE PRODUCTIVITY

### Intuitive User Interface With Simple Navigation

Take action with fewer clicks. Get more done, faster.

### Contacts With Avatars

Quickly find and call colleagues without having to remember their extensions. The contact list is automatically synchronized with the company directory.

### Presence

Save time by seeing whether your contacts are present, busy or away before you try calling them.

### Visual Voice Mail

View and manage voice messages from your mobile device. Touch to call back, if caller ID is available.

## ENJOY CONVENIENCE

### Microsoft® Lync® Server Integration

Collaborate through presence and IM with colleagues who use Lync to connect.

### Consolidated History

View call and IM history in one place for all the devices you use as UCedge extensions.

### Desktop Business Phone In Your Pocket

Your mobile device can do things you would expect from an IP5000 or DP5000 desk phone, such as extension dialing, call hold, transfer, conferencing and unified communications.

### One-number Reach

Give callers one number—your office number—to reach you whether you are in or out of the office.

## STAY FLEXIBLE

### Instant Messaging (IM)

Colleagues on the phone or busy? No problem. Communicate through individual, group or broadcast IM. Keep the conversation going as you move from one device to another.

### Flexible Calling Paths

Make calls from your mobile device through the office phone system over the device's cellular data service, a Wi-Fi® data service or other wired/wireless IP-based data service.<sup>2</sup>

### Cross-system Connectivity

If your company uses a mix of Toshiba phone systems, UCedge sees them as a single network. Features work consistently across company users and device types.<sup>3</sup>

## GET THE UCedge Client

play.google.com/store/apps

www.apple.com/itunes/

<sup>1</sup> UCedge Client currently available on Android and iOS devices, October 2014 for Windows and Mac devices.

<sup>2</sup> Softphone currently available on Android devices, available soon for iOS, Windows and Mac devices.
